EDUCATION

Lovely Professional University

Bachelor of Technology (Hons) – Computer Science Engineering 2020 – 2024

CGPA: 8.20 / 10

PROFESSIONAL EXPERIENCE

Software Development Engineer · The Regiment

Dec 2024 – Aug 2025

- Architected scalable full-stack features (JavaScript, Node.js, React.js) with OOP—improved end-to-end system throughput by 30%, validated via Grafana dashboards and SLO tracking.
- Owned RESTful API layer (PostgreSQL & MongoDB) end-to-end: indexing and root-cause query profiling cut average latency by 25%; authored API documentation adopted team-wide.
- Built reusable JWT + RBAC authentication module reducing access vulnerabilities by 40%; code splitting and lazy loading drove 35% lower page-load time, 20% higher engagement.

Associate Software Engineer · Enveu Software Technologies

Aug 2023 – Nov 2024

- Built and scaled distributed cloud-native applications on AWS (EC2, S3, RDS) across Agile sprints; log analysis and query profiling reduced API response times by 25%.
- Engineered Docker + GitHub Actions CI/CD for zero-downtime AWS deployments; maintained 99.9% uptime SLA; authored deployment runbooks adopted across teams.
- Instrumented Prometheus + Grafana: defined SLIs/SLOs, configured multi-threshold alerting — directly reduced MTTR for high-traffic distributed services.

Independent Software Engineer (Self-Directed)

Aug 2025 – Jun 2026

- Designed AI Shorts Generator: 4-agent Claude API pipeline (Python, FFmpeg) automating script generation, TTS narration, and video rendering end-to-end.
- Engineered Video Interview Platform and Project Management Dashboard — spanning WebRTC, isolated code execution real-time WebSockets, RBAC, and containerized AWS deployment.

PROJECTS

Video Interview Platform

[Live Link](#)

2025

Next.js · Node.js · PostgreSQL · PrismaORM · Clerk · StreamVideo · AWS Amplify

- Designed REST API backend for real-time 1-on-1 video interviews: room-based access control (2-participant lock), secure isolated code execution sandbox, and automated test case evaluation.
- Integrated Stream Video for low-latency WebRTC (screen share, recording) and Clerk for auth/RBAC; containerized services deployed on AWS Amplify.

Project Management Dashboard

[Live Link](#)

2025–2026

React · Node.js · Express.js · PostgreSQL · WebSockets · Docker

- Full-stack project tracker: real-time WebSocket updates, RBAC permissions, Gantt-chart sprint views; PostgreSQL indexing achieved sub-50ms REST API responses.
- Containerized with Docker; GitHub Actions CI/CD pipeline for multi-environment deployment.

TECHNICAL SKILLS

Languages: JavaScript · Python · JavaScript (ES6+) · TypeScript · C++ · Bash

Backend & APIs: Node.js · Express.js · RESTful API Design · Microservices · JWT/RBAC ·

Cloud & Infra: AWS (EC2, S3, RDS, IAM, VPC, EKS) · Docker · Kubernetes · GitHub Actions CI/CD

Databases: PostgreSQL · MySQL · MongoDB · Redis

Frontend: React.js · Next.js · HTML5 · Tailwind CSS · Redux

Tools: Git · Linux/Unix · Agile/Scrum · Code Review ·

ACHIEVEMENTS

- DSA & Problem Solving: Graph algorithms (BFS/DFS), Dynamic Programming, Binary Search, Tree traversals — applied to production optimization and system design decisions.
- Linux/Unix Production: Shell scripting (Bash), CRON automation, log analysis — backend SDE, DevOps, and SRE environments.
- Target Certification: AWS Certified DevOps Engineer – Professional (DOP-C02) — In progress.
